Harikrishnan R

B.Tech Computer Science and Engineering student interested in web development, app development, data structures, and low level programming. Actively seeking internships and collaborative projects to gain hands-on experience, strengthen problem-solving skills, and contribute to innovative solutions.

Location
Kerala, India

ACHIEVEMENTS

- 1st place at CODECRACK, A state-level Capture The Flag competition held at Federal Institute of Science and Technology (FISAT) in collaboration with IEEE CS Kerala Chapter (Team)
- 1st place at ARCHATHON, a national-level hackathon hosted by IEDC GEC Thrissur as part of the Summer Startup Festival 2025 (Team)
- 1st place at DSARENA, a DSA contest hosted by IEEE SB SJCET, Palai in collaboration with GeeksForGeeks
- Achieved global rank within top 20,000 on LeetCode (top 0.05% of users in 2025)

EXPERIENCE

- Full Stack Developer Intern at Intenxminds Private Limited
  Aug 2026 – Present
- Project Intern at Oracle India Private Limited
  May 2026 - July 2026
- Android App Developer Intern at Auvieo.AI
  Aug 2025 - Oct 2025

PROJECTS

Fractal
Compiler for a minimalistic programming language written in rust. Was part of a 3 member team that designed the pipeline and IDE. Implemented the lexer, parser and code editor.

ChatSocket
Terminal based chat application that supports room creation with aes based encryption. Designed the client server interactions, architecture and implemented everything in C with minimal dependencies.

Papyrus
A fully offline document viewer for android, built with Kotlin, Jetpack Compose and Room. Wide file type support and accessibility features.

Election Management System
Designed a Python-based election management application with Tkinter and SQLite, featuring real-time results and exports in multiple formats. Utilized SHA-256 admin authentication and deployed successfully in a school election at GHSS Panamaram.

CSS Assist
A support assistant to help in resolution of Service Requests (SR) during an internship at Oracle. Collaborated with a team of four interns using Rust, Tauri, FastAPI, and Oracle Cloud Infrastructure (OCI).

Automata
A Regex-to-NFA converter using JavaScript (frontend) and Python (backend); constructs equivalent non-deterministic finite automata from regular expressions, demonstrating knowledge of formal languages and state machines.

Proxy
Co-hosted a 7-hour national-level CTF competition; deployed and secured the CTFd platform on AWS with SSL and log monitoring; designed 20+ cybersecurity challenges across web, cryptography, reverse engineering, and networking.

CERTIFICATIONS

- Ethical Hacking (NPTEL) : Ranked in the top 5%
- Python Developer Certification (FreeCodeCamp) : Representing approximately 300 hours of work.
- Introduction To Machine Learning (Kaggle) : Completed hands-on course on ML fundamentals
- Backend Development Bootcamp (DevTown - GDSC) : 7-day course on server side development

EDUCATION

Government Engineering College Thrissur, Kerala | Ongoing
Bachelor of Technology in Computer Science and Engineering
CGPA up to and including semester 6: 9.39

Amrita Vidyalayam | 2023
Senior Secondary School Education
95.8%

SKILLS

- Programming Languages: Python, C, TypeScript, Rust
- Web Development: React, SvelteKit, Node.js, Tailwind
- Apps: Tauri, Flutter, Android Studio, Kotlin
- Databases: PostgreSQL, Firestore, Oracle AI DB
- DevOps: Docker, Github Actions
- Tools: Git, Postman, Figma, Kali Linux
- Languages: English, Malayalam, Hindi
